## How to say in french time zone

Have you ever wanted to know the time and date in Chicago so you can phone home while vacationing in the UK? Calculating time zone differences is relatively straightforward, and it's a helpful trick to know for anybody who travels a lot but likes to keep in touch with family. Calculating Time Using World Time ZonesThe world is divided into 24 equal sections based on meridians of longitude, so they're each 15 degrees apart. Each line you cross differs from the previous line by one hour, so if you travel east, each longitude line you cross is one hour later than the previous line. On the other hand, if you travel west, the space between each longitude line you cross over is one hour earlier than the previous line. This division of time sometimes complicates international travel. For example, you could decide to phone home bright and early in the morning during your vacation to England to find that not only is it night back home but it's also a different date.Understanding Universal TimeFortunately, there's a unified way of determining the time anywhere in the world. Coordinated Universal Time, usually called UTC or just UT, is a way of representing time consistently across the time zones. UTC is based on the time at the 0-degrees longitude meridian, which runs through Greenwich, England (previously known as Greenwich Mean Time, or GMT for short). This means that universal time is effectively the current time in England.Converting Universal Time to Local TimeKnowing that UTC is based on the time in Greenwich, England, means it's possible to convert it to local time by using the different time zones. For example, if the UTC time is 14:00 on the 24-hour clock, and you live two time zones to the east, you know that your local time is 16:00 (UTC plus two hours). If you live four time zones to the West, you know that your local time is 10:00 (UTC minus four hours). Using an Online Time ConverterHaving access to the internet means that the answers to common problems are never more than a mouse-click away. There are plenty of online time converters, such as the Time and Date website, that are free to access and use. These sites make it easy to determine the time anywhere in the world. Simply enter a location or time zone to calculate relative time differences instantly. For globetrotters, having such online resources available on a phone makes traveling much easier.What Is UTC Used For?Having a single coordinated time is particularly useful in any applications involving international trade and transit. For example, UTC helps in the organization of intercontinental freight transportation, train services, aviation, weather, astronomy, scientific research and military operations. Of course, for most people, it's just a useful way of making sure they don't accidentally wake up mom and dad when they phone during a European vacation. Votre permission d'achat temporaire paraîtra automatiquement dans les options de paiement lorsque vous passez à la caisse et elle est valide jusqu'à 23 h 59 HNE le jour de l'approbation et sera limité à un montant prédéterminé par la Banque Walmart du Canada. At approximately 17:28 Eastern Standard Time (EST), in low light conditions, the aircraft entered the autorotation at 2400 ft above sea level (ASL) and continued its descent until it impacted the snow-covered frozen field. Vers 17:28, heure normale de l'Est, par faible luminosité, l'hélicoptère amorce une autorotation à 2400 pi ASL et poursuit sa descente jusqu'à ce qu'il percutte le terrain gelé recouvert de neige. Orders received after 4 pm Eastern Standard Time (EST), including those received on Quebec statutory and civic holidays, are processed at the end of the next business day. Les commandes reçues après 16 h, heure normale de l'Est (HNE) et celles qui sont reçues un jour férié du Québec, sont traitées à la fin du jour ouvrable suivant. The table below is for a second that is based on the New York Times when the Day Light Saving Time (DST) and Eastern Standard Time (EST or ET). Le tableau ci-dessous nous pour un second qui est basé sur le New York Times où la lumière du jour Saving Time (DST) et Eastern Standard Time (EST ou ET). During the return flight, at approximately 12:49 Eastern Standard Time (EST), the aircraft struck a power transmission line's overhead ground wire, which crossed the Franquelin River. Que. Au retour, vers 12 h 49 heure normale de l'Est (HNE), l'appareil a heurté un fil de garde d'une ligne de haute tension qui traverse la rivière Franquelin (Qc). No results found for this meaning. Word index: 1-300, 301-600, 601-900Expression index: 1-400, 401-800, 801-1200Phrase index: 1-400, 401-800, 801-1200 If you want to know how to say time zone in French, you will find the translation here. We hope this will help you to understand French better. Here is the translation and the French word for time zone:Time zone in all languages Yes, time zones have French names and acronyms and their use is recommended by the OQLF. Here are the official ones used in Canada: HAA : Heure Avancée de l'Atlantique HAC : Heure Avancée du Centre HAE : Heure Avancée de l'Est HAP : Heure Avancée du Pacifique HAR : Heure Avancée des Rocheuses HAT : Heure Avancée de Terre-Neuve HNA : Heure Normale de l'Atlantique HNC : Heure Normale du Centre HNE : Heure Normale de l'Est HNP : Heure Normale du Pacifique HNR : Heure Normale des Rocheuses HNT : Heure Normale de Terre-Neuve Here is a map showing where they apply: There is also a French name for the Central European time zone HAEC : Heure Avancée d'Europe Centrale HNEC : Heure Normale d'Europe Centrale Should you want a "neutral" time zone name which works whatever the language, you might use the offset from the reference time zone, e.g.: EST = HNE = UTC-5 : Universal Coordinated Time -5h = Temps Universel Coordonné - 5 h. See Timezoneswest.PNG The UTC acronym was chosen as a compromise between French and English speakers, the former wanting TUC and the latter UCT. You missed to "translate" AM (actually drop AM/PM and switch to a 24h clock) and "standard" matches "normale", not "avancée" so that should be: 2 janvier 2003 04:55 HNP
